Vigillo announces affiliate program

Vigillo, creators of data mining software products designed to aggregate, organize and deliver complex fleet safety information in an easy-to-read scorecard format, announced its Affiliate Member Program offered at no cost to all DOT regulated motor carriers in order to give their drivers, past and present, the benefit of Vigillo's Roadside Resume, a free Compliance Safety Accountability driver scorecard service.

"This program is really about basic fairness," says Steve Bryan, chief executive officer of Vigillo. "Vigillo believes it is imperative that drivers have access to the scores the government keeps on their safety performance."

Vigillo says its [www.roadsideresume.com](http://www.roadsideresume.com) allows a driver to see his or her CSA score, whereas the Federal Motor Carrier Safety Administration does not release driver CSA scores. Roadside Resume is intended to be a benefit that carriers can make available to its drivers at no cost now or in the future for either the Affiliate Member or the driver.

Fleets can go to [www.vigillo.com/affiliate](http://www.vigillo.com/affiliate) to become an Affiliate Member and Join the Wiser Fleet Movement. "Many drivers have told us how happy they are to have free access to the CSA scorecards through Roadside Resume," Bryan says. "We look at it as a way to demonstrate that when an industry collaborates on a shared database, everyone wins."
